To Whom It May Concern,

In 2012, the Los Medanos Healthcare District approved a budget to include placement of AEDS into the community. CPR FAST is assisting LMCHD with this placement. In the past we have been able to place 4-5 AEDs into the community and also provide CPR and AED training to the locations.

At this time CPR FAST is in the research stage and has not spent any of the allotted funding. We have been working with a Contra Costa Work Group to determine the best placement for the AEDs. After the locations have been determined, and the sites agree to the placement of the AEDs, we will begin spending the approved funding.

Again, we hope to be able to place 4-5 AEDs into the LMCHD community and provide CPR and AED training at each site. CPR FAST is excited to be able to continue working with LMCHD on this project and place lifesaving AEDS into the community.
